// FEATURE HIGHLIGHTS

1 Rotax® 600 EFI engine

600 cc-class fuel-injected engine delivering 85 horsepower and outstanding economy at an incredible value. Design based on the 600R E-TEC with proven reliability and ease of ownership at its core with an outsized fun factor.

3 cMotion™ rear suspension

Crossover-specific suspension uses best principles of the rMotion™ trail and tMotion™ mountain skis for confident cornering and agile boondocking.

2 Electric start

Saves time and energy, adding immense value for the rider.

4 RAS™ 3 front suspension

Similar geometry and steering to the RAS 3 mountain front end for capability and light steering feel on- and off-trail. Optimized for crossover usage, two ski stance positions dial in handling: 40.2 in. [102 cm] or 38.4 in. [97.5 cm].

5 Pilot™ DS2 skis

Single keel with excellent sidehilling bite, thanks to thin outer edges. Narrow and thin, yet stiff. Shorter behind the spindle with flat tail for easier counter-steering and sidehilling.

6 Ergo-step side panels

Design offers natural progression to three natural positions for different cornering styles, including a new, extreme-forward position.
