WHAT MAKES A GOOD SNOCROSS STYLE HELMET

Choosing a helmet is a personal decision and there are many factors to consider. In this case, we'll examine what makes a good snocross or "open face" helmet — where goggles will be used for eye coverage — and look at what's important for protecting yourself.

OUTER SHELL

You're looking for quality construction for protection and light weight for ease on your neck and shoulders during all-day rides. The XP-R2 is made of pure carbon fiber for excellent protection with a weight starting at 1,120 grams.

INNER SHELL

Most all helmets use EPS foam. Where they differ is how many types, with different densities, are used for maximum energy absorption and comfort. Entry level helmets use just one foam. The XP-R2 uses multiple types of interlocking EPS foam.

LINING

This is the part contacting your head so it has the biggest effect on comfort. You want durable material and cushioning that holds up for comfort. Premium helmets like the XP-R2 have a removable liner that can be washed. The liner uses CoolMax† fabric to wick sweat to keep you dry and an antimicrobial coating to eliminate odors, and it also has pouches that hold replaceable sweat absorbing pads.

VENTILATION

Even as a winter-only rider, you'll want excellent ventilation built-in to keep your head dry and prevent overheating. The XP-R2 has 13 vents and an inner shell designed to move air through the helmet.

5 VISORS

They're not just for style but function too in order to shield the sun. The XP-R2 uses shock-absorbing tool-less mounting screws to quickly change positions, and its anti-reflective surface underneath reduces glare.

6 EYE PORT

Bigger is typically better, but be sure your goggle of choice will fill the eye port for optimal warmth and protection. The Scott goggles offered by BRP this year provide a great fit with the XP-R2.

7 CUSTOMIZABLE FIT

A good fit is absolutely key for all-day comfort. Right from the start, the XP-R2 has two different shell sizes, rather than trying to cover all sizes with one shell. You can also customize the fit around your face with alternate cheek pad kits.

8 EXTRAS

Look for the little things like integrated goggle locating/anti-slip features, stainless steel hardware, flexible stainless nose guard, aerodynamic stabilizer and absorbing bumper for neck braces – these further separate a premium helmet from the pack.

9 CERTIFICATION

DOT and ECE 22.05 are the standards you want to be sure any helmet meets. Other measuring and testing standards exist, with varying degrees of pros and cons, but a helmet should at a least meet DOT and ECE requirements.

TOP REASONS WHY YOUR BRP ROTAX ENGINE DESERVES XPS

We created hundreds of test oils and formula modifications before determining the ideal one.

The additive formulation is unique, designed specifically for the unique needs of E-TEC engines.

Validated through thousands of dynamometer hours, and thousands of trail miles.

We invested more than $3 million and more than I million miles of field testing to develop both 2-stroke and 4-stroke oils over three years.

While the aftermarket spends millions marketing their oils, we are investing millions on developing the best oils to protect your investment. XPS is the only lubricant specifically engineered, developed, tested for your 2-stroke ROTAX engine.

ENGINE OILS

XPS 2-Stroke Synthetic Oil

Full synthetic XPS 2-cycle oil provides the ultimate in wear protection - which is absolutely critical in E-TEC applications where less oil is used. WE KNOW PARTS LIKE NO ONE ELSE

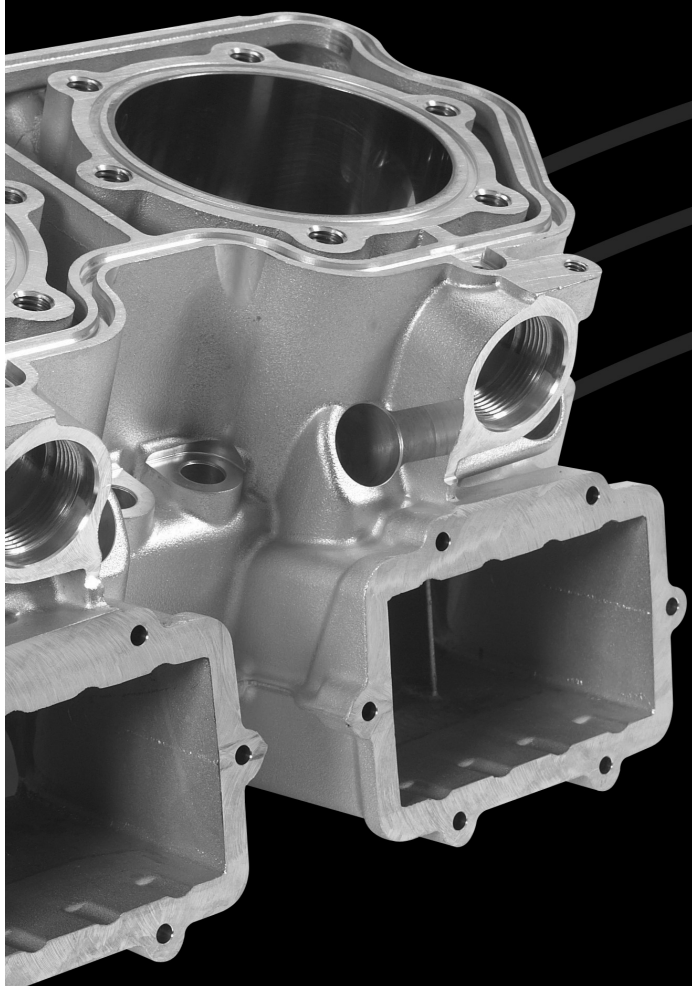
BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.



WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty

REGULAR ORDER AND CORE RETURN PROCEDURE

TO DO	WHAT TO DO
Place an order	Simply use BOSSWeb™.
Return a core without a Rebuild Credit Form*	• Identify each core as much as possible. Tag them and indicate the engine type as reference. • Fill out and enclose a copy of the enclosed "Universal" BRP Rebuild Center Core Credit Request Form with the cores in your shipping box (for additional forms go to BOSSWeb.)
Return a core with a Rebuild Credit Form	• Return the white copy of the Rebuild Credit Form, included with every rebuilt part shipped by the Rebuild Center, along with the core. • Cores received with the yellow copy or with a photocopy will be considered as core returns without the Rebuild Credit Form. The white copy is, therefore, required in order to receive the proper credit amount.

*Go on BOSSWeb/(comcenter/rebuild program) for full details
