DESCRIPTION	• Reduces steering effort and darting. • Specifically designed for Touring applications. • Skis sold individually.	• Lightweight single runner skis provide virtually effortless steering at low speeds, and constant grip without compromise at higher speeds.	• The industry's first and only adjustable ski: the Pilot TS Skis are the critical factor in steering precision and effort, yet their performance is dependent on snow conditions, which can change in hours. • With the Pilot TS ski, you can dial-in ski bite for conditions or your riding style by turning a knob on the ski leg. • It raises or lowers the ski runner over a range of 1/2" (12.5 mm). • This thin runner and new square keel design work together to make darting a thing of the past. • Easy-install custom color ski changes the appearance of your sled in minutes. • Patent pending US20150314799A1	• Same single keel ski equipped on the RS race sled. • Designed for aggressive riders.	• Designed specifically for mountain riding. • Vertical outer edge dramatically improves sidehilling bite. • Narrower and thinner, yet stiffer for dependable steering and carving. • Boot grips more effective than ever. • Carbides sold separately. • Skis sold individually.	• Keel design offers unmatched steering performance when used in conjunction with new ski leg. • Lower steering effort, increased agility and predictability. • Color options available to customize your sled. • Sold individually.	• Designed to work with deeper and longer tracks. • 12 mm deeper keel than DS-2. • Redesigned top-side bracing reduces weight of each ski by 0.28 lb (125 g). • Sold individually.

Woody's Dooly[MC] Carbides

The Dooly† by Woodys has two 7/16" Flat-top† runners mounted on a plate for each ski. Four contact lines on snow surface help decrease darting of sled as it makes own groove in a trail. When in a turn, only one of the Dooly bars is in contact with the snow or ice. A Dooly with 4", 6" or 8" of carbide on both runners provides the same turning power as a single runner with 4", 6" or 8" of turning carbide.

MORE THAN JUST OIL

The XPS brand has a complete family of performance products to expertly protect, enhance, and extend the life of your BRP vehicle. Every XPS product has been tested and approved for complete peace of mind. No second guesses, no assumptions. The exact product to use, every time.

AFTER ALL, YOU ONLY GET OUT WHAT YOU PUT IN... SO IF YOU'RE CHOOSING ANYTHING OTHER THAN XPS, THEN YOU'RE NOT GIVING YOUR SKI-DOO SNOWMOBILE THE ABSOLUTE BEST.

USING THE RIGHT OIL MATTERS

The right oil delivers:

THE BEST PERFORMANCE
THE BEST RELIABILITY
THE LONGEST LIFE

It's a balancing act to deliver all three attributes – and only XPS, with its custom blend formulations and carefully matched additives, is specifically designed to do just that in a Rotax engine.

"The best oil is the oil that was specifically designed for the engine, without compromising the engine."

Mischa Zimmermann
Project Leader Engine Development, BRP

Find out why oil matters at www.xpslubricants.com

DOES ONE OIL FIT ALL?

Our efficient, high-output engines place strong demands on engine oil. At BRP, we treat oil like an actual mechanical part that needs to be developed alongside the engine it is intended for, throughout its entire design, testing and validation process. XPS is the best choice for our Rotax engines because the oil is engineered at the same time as our existing and emerging new engine technology. Each engine type has its own specific needs and characteristics that the oil must match. Not all oil manufacturers do.

2-STROKE OIL
Fact: XPS synthetic 2-stroke oil is subjected to extensive research and validation to allow the unique properties of E-TEC technology to reach their full potential. It's the kind of chemistry you won't find in any other oil.

4-STROKE OIL
Fact: XPS 4-stroke oil is BRP engineer-certified for unmatched lubrication, quick and easy cold starting, and oil flow in harsh winter conditions and extreme cold temperatures that delivers cold start protection against engine wear.

WHY NOT CHOOSE A LOW-COST ALTERNATIVE INSTEAD OF XPS ENGINE OILS?

BRP engineers and experts like Mischa Zimmerman have proven repeatedly that other brands of oil behave differently in Rotax engines.

- Each vehicle manufacturer establishes their own internal matching and compatibility standards and criterias for their OEM oil manufacturer.
- Aftermarket oil suppliers mostly follow existing industry standards for compliance purposes, but this is a common practice for general applications, and nowhere near the synergetic and concurrent engine-engine oil design and validation procedure we adhere to.
- Even oil that is more expensive than XPS will not have the same custom-matched results.
- Only XPS is designed exclusively in synch with Rotax engine technology, including its high-demand E-TEC direct fuel injection.
- Our oil is tested on the whole line-up of vehicles we manufacture and their engines – not just one or two models – and despite what other oil suppliers claim, we actually validate and revalidate the life span of both the engine and vehicle, meaning we put in thousands of dynamometer hours and hundreds of thousands of miles of hard real world test riding, as opposed to relying only on the equivalent of one season of usage other oil suppliers advertise.

AREN'T THERE OTHER HIGH QUALITY OILS ON THE MARKET?

Yes. But no other oil is designed as an actual mechanical part during engine development like XPS. The best oil is the oil engineered with carefully matched additives matrixed to meet exactly what the engine needs. Your satisfaction matters. We want you to have the best experience with your BRP vehicle, so we set extremely high standards for XPS oil.

WHY USE XPS OIL IN YOUR SKI-DOO SNOWMOBILE?

Oil Matters. The right oil will give your engine the best performance, reliability and long life. It's a balancing act to deliver all three attributes – and only XPS is specifically designed to do just that in Rotax engines.

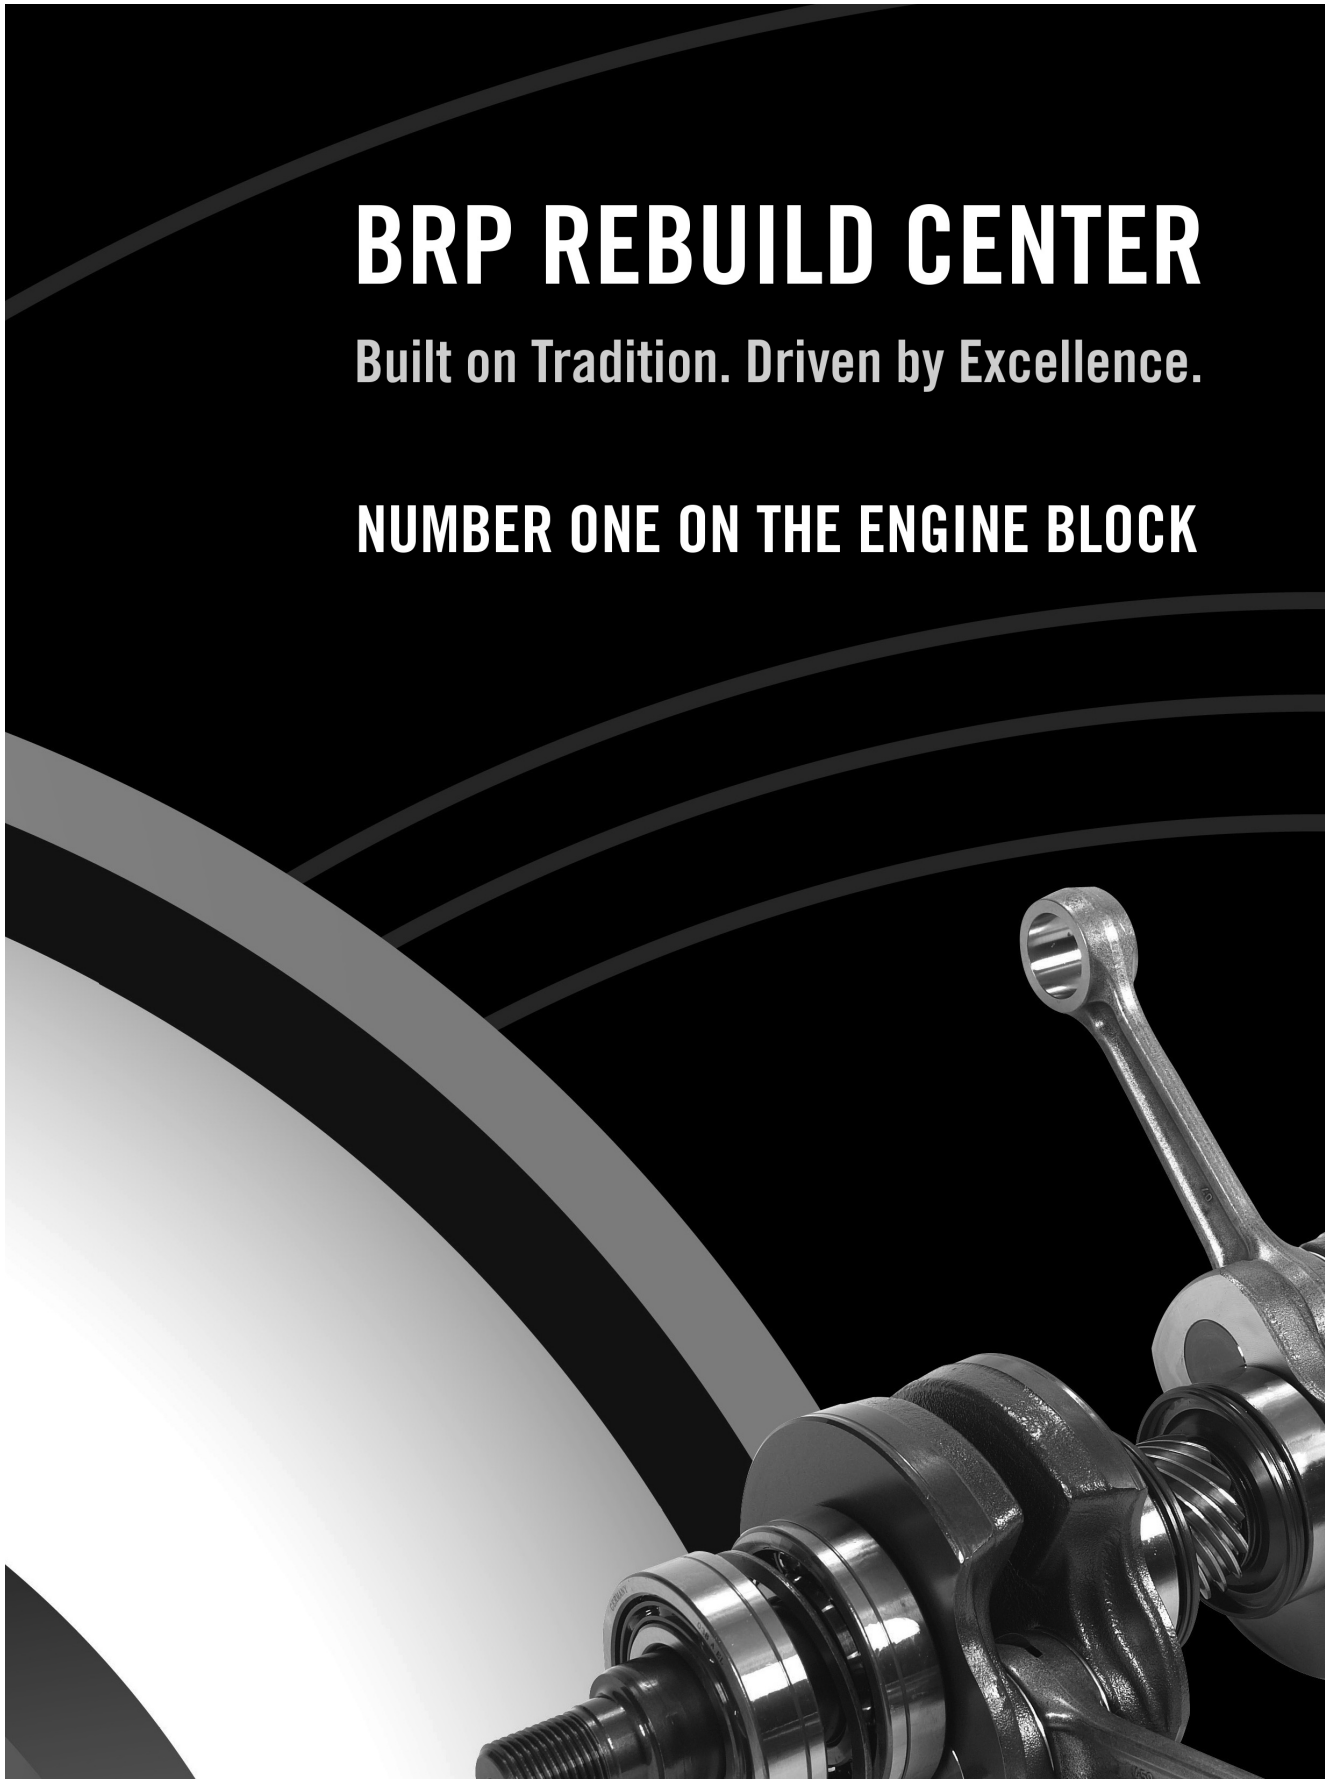
BRP REBUILD CENTER

Built on Tradition. Driven by Excellence.

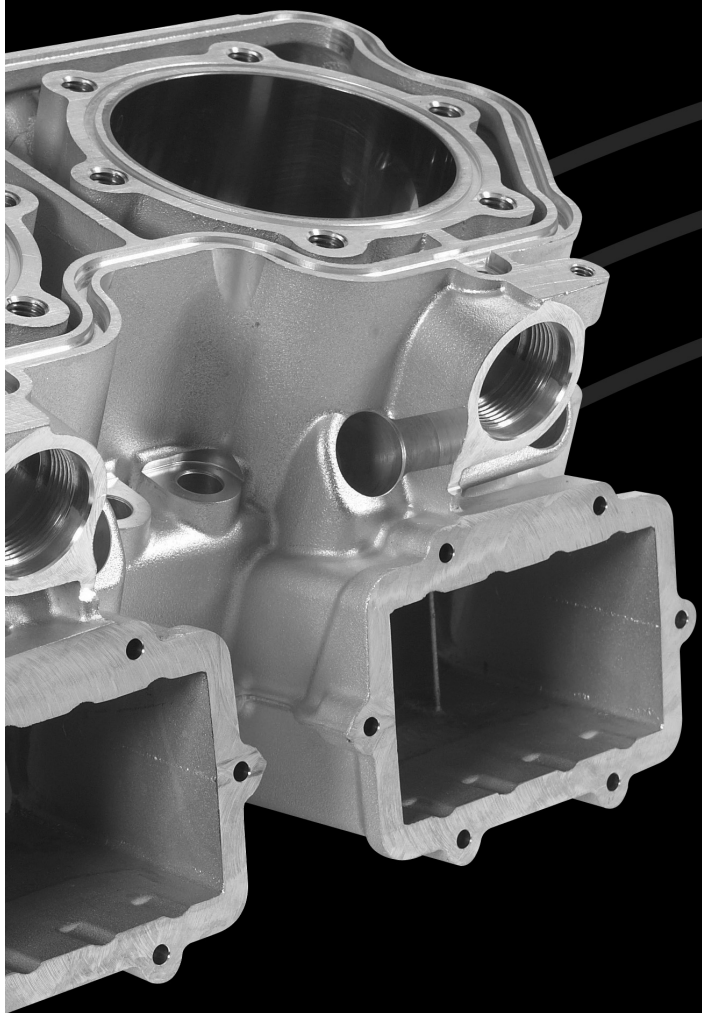
NUMBER ONE ON THE ENGINE BLOCK



REBUILT PARTS

WE KNOW PARTS LIKE NO ONE ELSE

BRP's commitment to quality and customer satisfaction goes right down to the core. Every rebuilt part that leaves our center meets Rotax's rigorous standards – guaranteed. What's more, we don't compete with our dealer network by selling directly to consumers. Our mission is to help you generate business.



WHERE PARTS COME TO LIFE

Everything about our BRP multi-million dollar remanufacturing centre in Sherbrooke, Quebec is tooled and staffed with one thing in mind – to ensure that Rotax's legendary durability and performance come to life in every BRP-rebuilt short block, crankshaft and cylinder.

HOW WE DO IT?

1. DISASSEMBLY

- Short block components that can be remanufactured to original specs are saved
- All other components are discarded
- Reusable parts are cleaned to remove oil
- Castings are sandblasted
- After further inspection, reusable parts are repainted

2. REMANUFACTURE

- Nikasil cylinders are replated by Rotax® and piston fit is matched
- For steel-sleeved cylinders, sleeves are replaced with new Rotax parts and line-bored
- Then piston fit is matched
- Crankshaft webs are the only component of the crank even considered for reuse as a rebuilt part
- When a reusable component is not available for replacement, new Rotax parts are used
- Only components that meet our highest standards ever make it past this point

3. REASSEMBLY

- Crankshaft wheels are pressed together with all new Rotax bearings, seals and rod assemblies
- They're balanced and blueprinted to within .001"
- Crankshafts are set, crankcases are sealed and torqued to OEM specifications
- All short block assemblies are completed with new Rotax standard size pistons, rings, bearings and gaskets

4. TESTING & WARRANTY

- After reassembly, all short blocks are run through a battery of tests, including pressure testing
- Our quality-tested and -controlled products are backed by a comprehensive one-year limited warranty that covers parts and labor
- Replacement rebuilt crankshafts and cylinders also have a one-year parts only warranty
