THE SCIENCE OF LAYERING

WHETHER YOU'RE INTO MOUNTAIN,
BACKCOUNTRY OR TRAIL RIDING,
STAYING WARM AND DRY IS ESSENTIAL.
IT'S ALL ABOUT LAYERING; A SCIENCE
WE'VE PERFECTED.

Find the perfect combination of base, mid and outer layers
in the following pages.

01 BASE LAYERS AT THE CORE OF EVERYTHING.

It all starts here;
It's essential to stay
dry to stay warm.
Base layers wick
away moisture from
perspiration against
your skin, the first
crucial step in
preserving warmth.

02 MID LAYERS COMFORT THAT ADJUSTS WITH YOU.

Using a mid layer
allows you to adjust
your ideal warmth
level. Winter weather
is notoriously
variable. Stay
ahead of the game,
stay comfortable.

03 OUTER LAYERS NON-INSULATED INSULATED YOUR FIRST LINE OF DEFENSE.

Keep out the elements
and hold in the warmth.
We offer outer layers
engineered with the
highest performance
materials like Sympatex,
Primaloft and RPM
technologies to match your
riding style and needs.

BUILD YOUR OWN SYSTEM.

We make it easy to choose the right gear by rating all layering options with easy-to-understand bar graphs and relevant information to help you dial in the perfect balance of comfort and performance for you.

BASE LAYERS

Base layers are essential to every rider, regardless of style. They wick away moisture from perspiration to keep you dry - which is the first step to staying warm and comfortable - so the mid layer can add the warmth while the outer shell keeps the wind and snow where it belongs - out.

NEW Merino Base Layers

Merino wool base layer delivers excellent warmth while wicking away moisture, soft to the touch.

- Permanent anti-odor performance.
- Vintage logos.

TECHNOLOGY GUIDE

ABSOLUTELY WATERPROOF. HIGHLY BREATHABLE. DRY AND LIGHT. FOR DEMANDING RIDES YET TO BE TAMED.

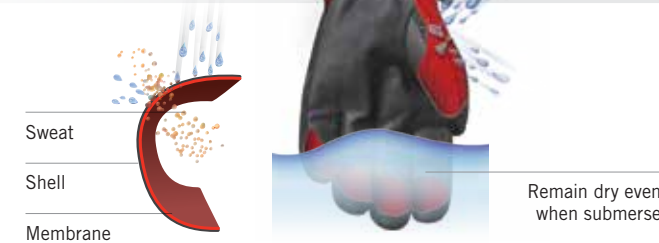

OutDry uses a one-piece patented construction process that creates a waterproof breathable barrier. This impenetrable layer is heat-bonded directly to the outer fabric, leaving no seams, no gaps, and no way for water to get in. You can submerge OutDry gloves in water and your hands will remain dry.

Look for our ultimate gloves featuring the OutDry technology logo:

OUTDRY TECHNOLOGY

OutDry improves fit and dexterity, keeping you drier and more comfortable.

COMPARE to traditional waterproof technology.

OTHER TECHNOLOGY

Water gets in and stays in, collecting in the space between the inner and outer layers, making them heavy and wet.

PRIMALOFT[®]

- A high-performance insulation with the full spectrum of benefits to brave the elements.
- Committed to delivering feel-good products that empower you to stay in the moment. Warer, drier, softer and more compressible than any other synthetic insulation.

mcFIT

MCFIT manufacturing technology bonds, rather than sews, the inner layers of the gloves together, so that you get the best feel, grip and performance.

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Height: Without shoes, standing with heels and back against a wall.

Head: Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

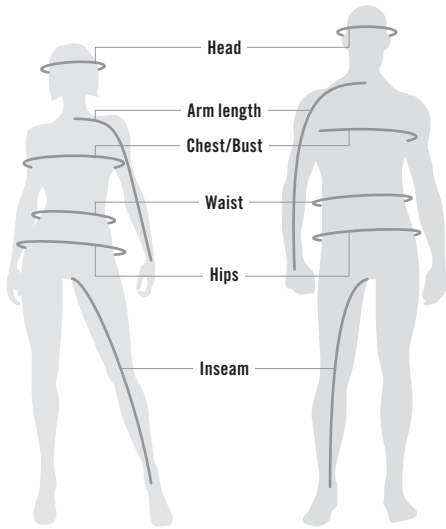

Arm length: Let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

Chest/Bust: Measure under your arm, around the fullest part of your chest.

WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is THE CODE you use to complete the part number on your order.
Example: 440 227 90
Size: M = code "06",
Therefore 440 227 06 90

To install the studs, always use the installation tools, procedures and torque specified in the instructions. Proper installation provides maximum product longevity and helps prevent track damage. BRP recommends that studs be installed by authorized BRP dealers, and on approved pre-patterned tracks only. These tracks come standard on most 2019 Ski-Doo snowmobiles. Look for this symbol on your track. Woody's products are designed to fit and interact with each other. The stud nut and support plate form a complete unit. The use of aggressive skis, ski carbide runners or studs will alter the handling of your snowmobile, particularly in terms of manoeuvrability, acceleration and braking. Please refer to your Operators Guide for more details.

WHEELS & SLIDER SHOES

Sliders with Vespel[†] Inserts

- Uses DuPont Vespel inserts for less friction.
- Can be cut to desired lenght.
- Better fuel efficiency, more power and increased vehicle speed, due to reduced friction between the track clips and slides.
- Reduced need for maintenance and associated costs.
- Extended life due to enhanced wear characteristics of Vespel polyamide over incumbent UHMW PE.
- Allows riders to operate sleds in less than acceptable snow and trail conditions since water from snow is not needed for lubricity as with incumbent UHMW PE slide rails.
